8 scroll all the way down and Click "Save Settings"

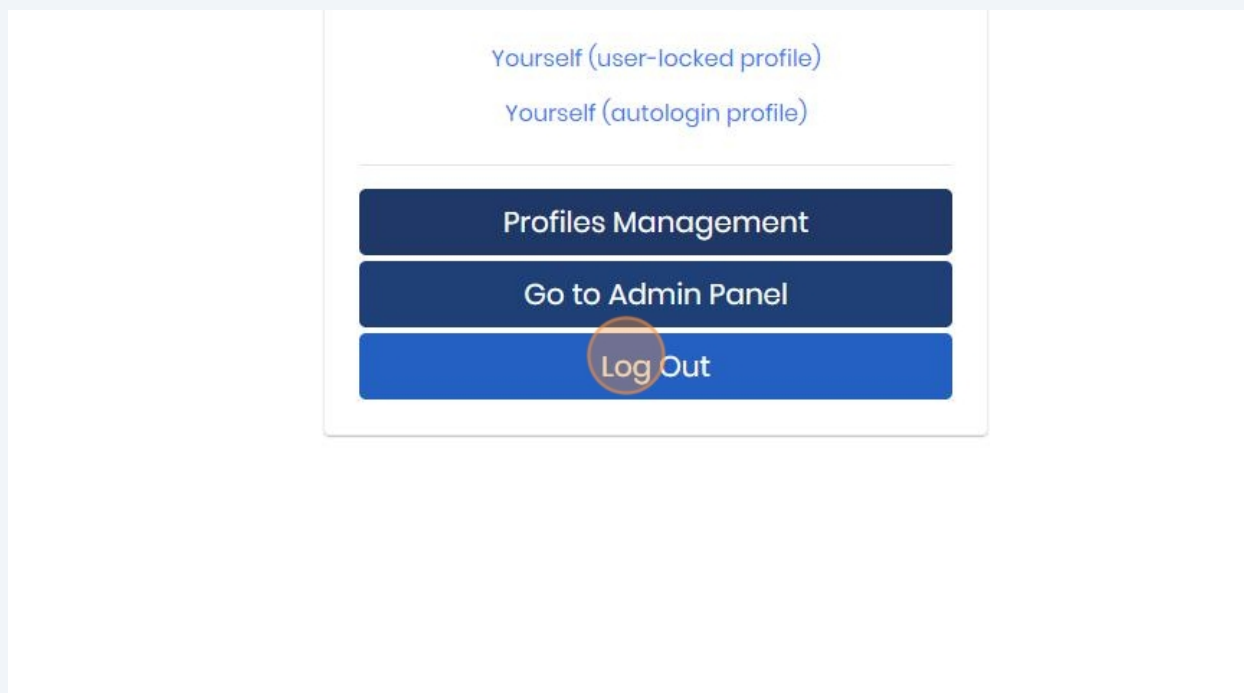

9 then at the top Click "Update Running Server"

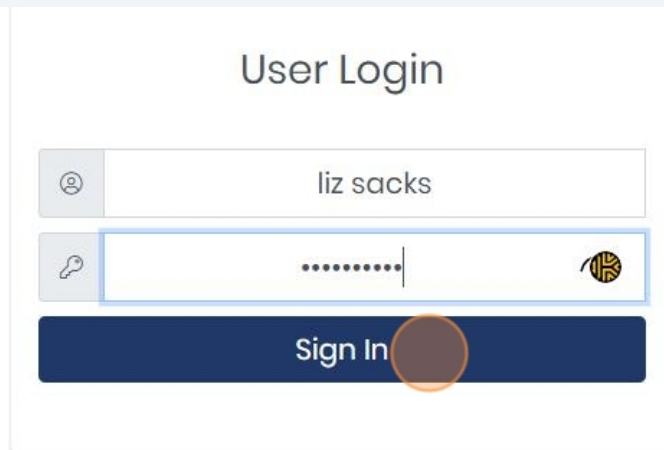

10 now go to <https://brcjbloom.ddns.net:943>

11 Click "Log Out" if not already logged out and sign into the user you changed the password for

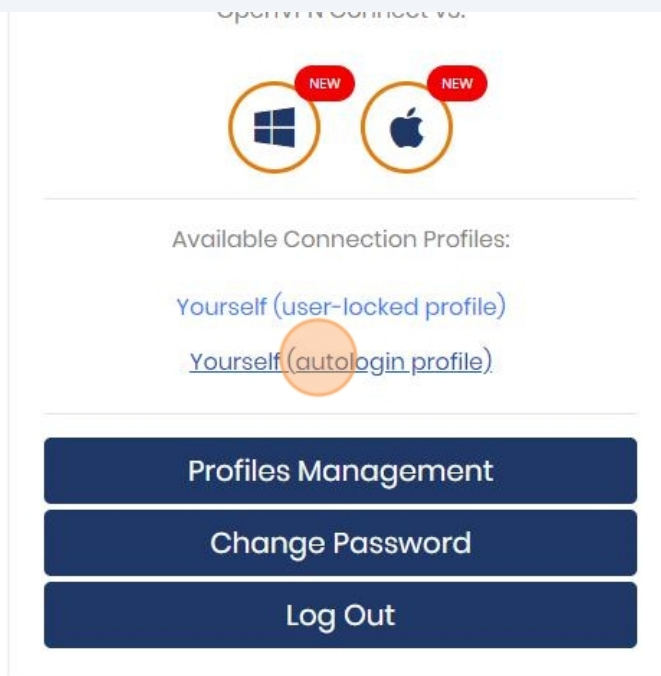

12 Click "Sign In"

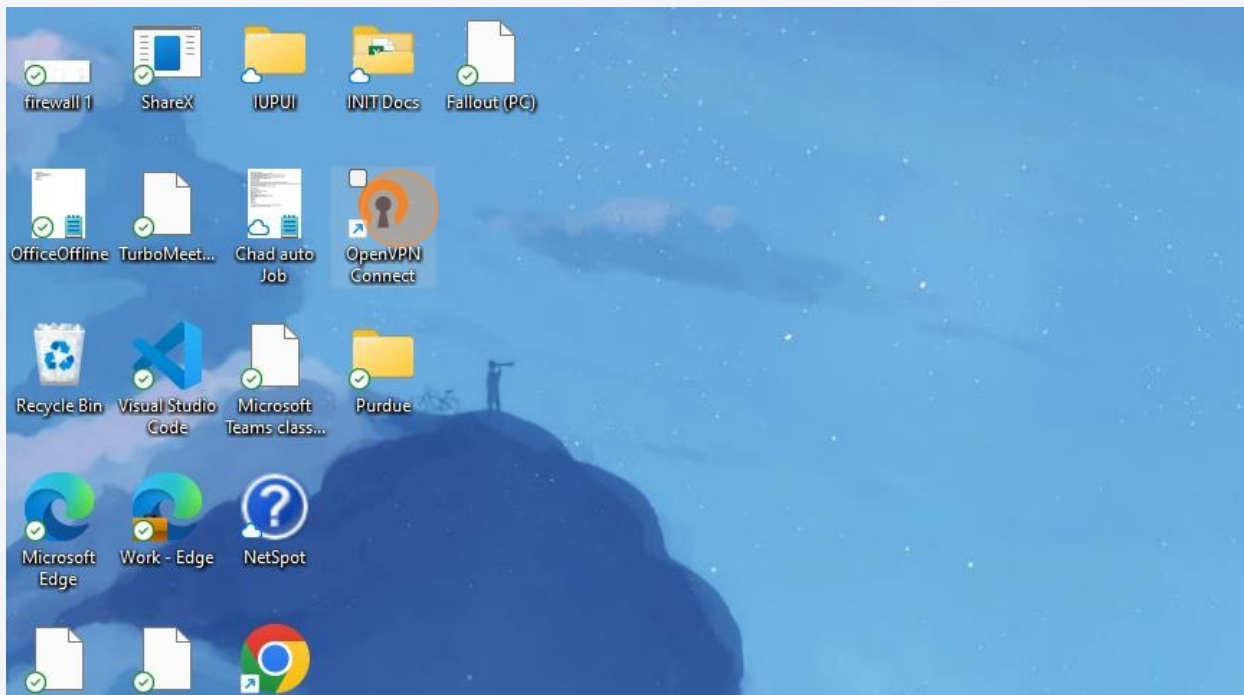

The image shows a 'User Login' form. It has a title 'User Login' at the top. Below the title are two input fields. The first field contains the text 'liz sacks' and has a person icon on the left. The second field contains a series of dots and has a key icon on the left and a globe icon on the right. Below these fields is a dark blue button with the text 'Sign In'. An orange circle highlights the 'Sign In' button.

13 Click "Yourself (autologin profile)" this will download the VPN profile

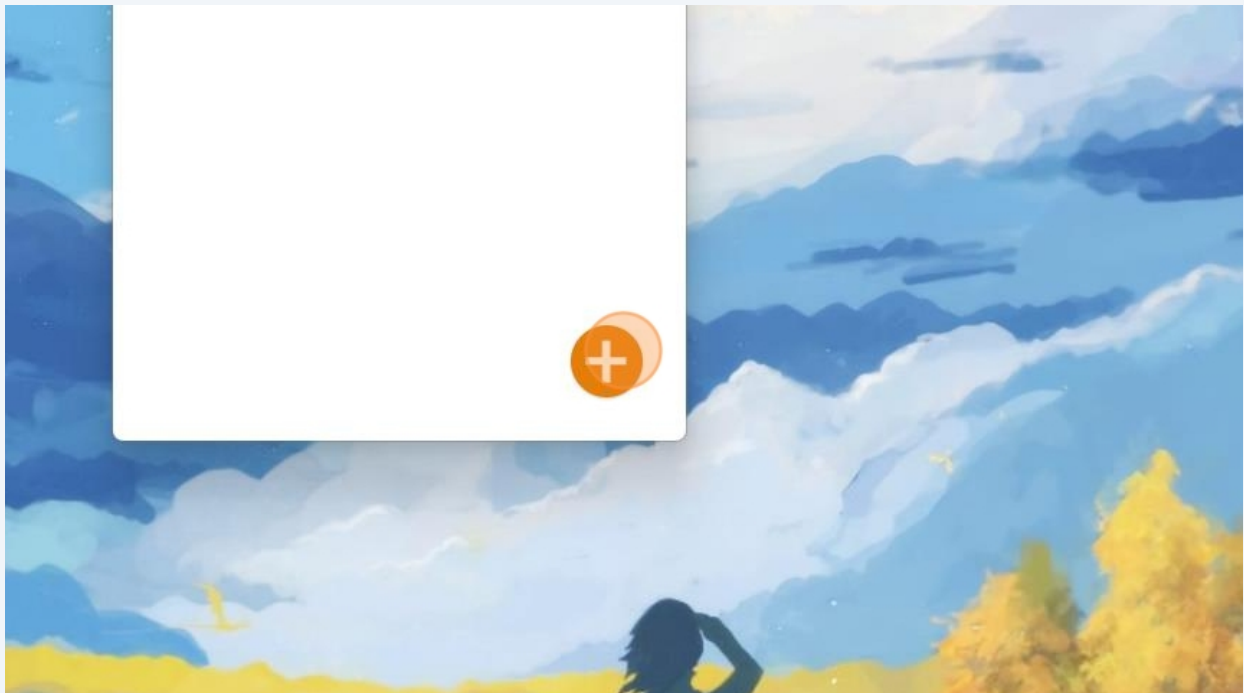

The image shows a screen for selecting VPN connection profiles. At the top, there are two circular icons with 'NEW' labels: a Windows logo and an Apple logo. Below these icons is the text 'Available Connection Profiles:'. Under this text are two links: 'Yourself (user-locked profile)' and 'Yourself (autologin profile)'. The second link is underlined and has an orange circle highlighting it. Below the links are three dark blue buttons: 'Profiles Management', 'Change Password', and 'Log Out'.

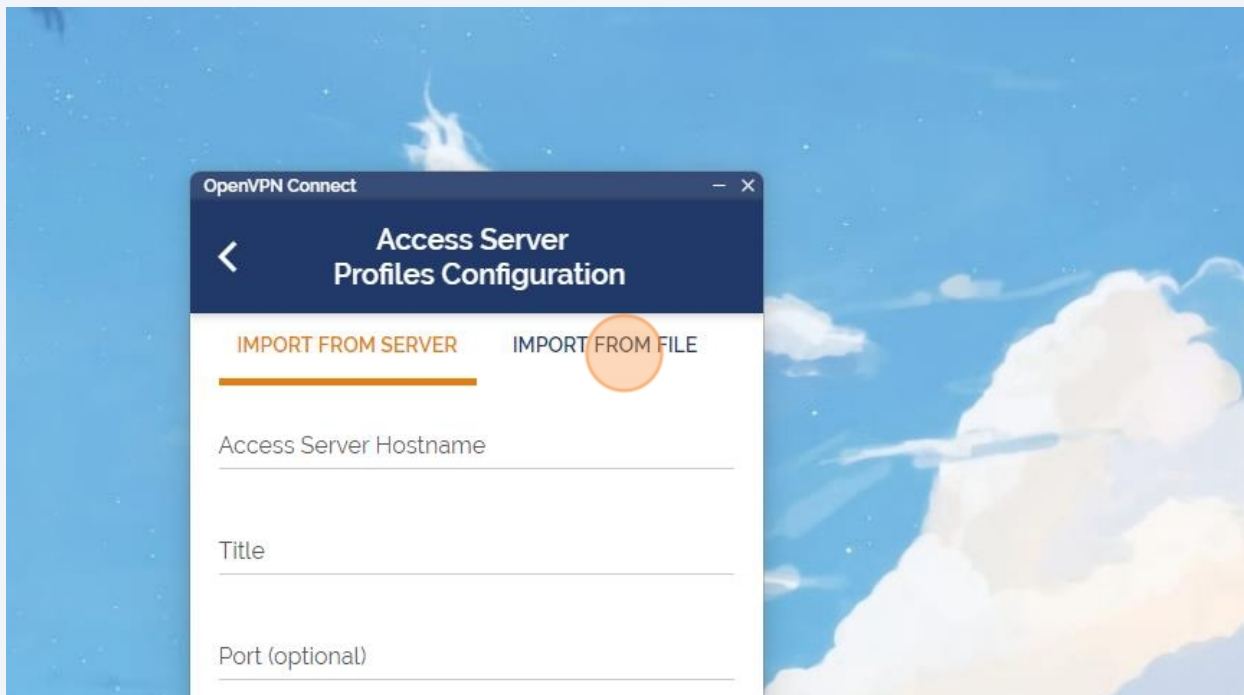

14 Double-click "OpenVPN Connect"

15 Click the plus symbol

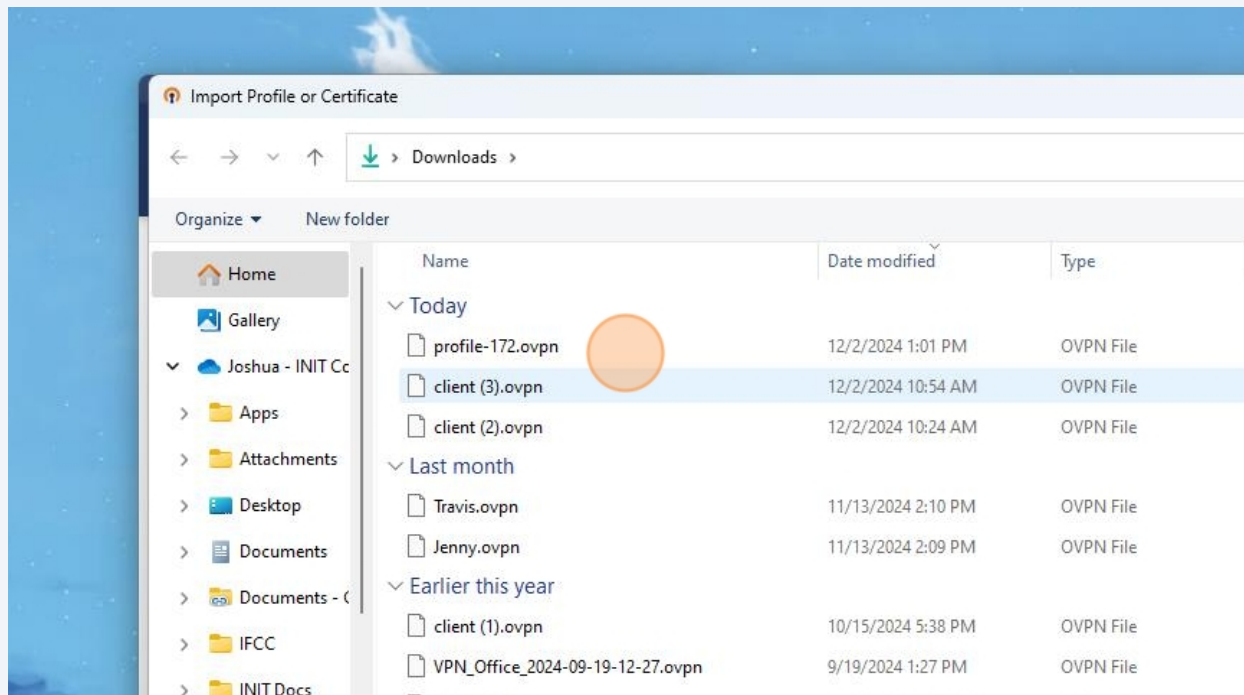

16 Click "import from file"

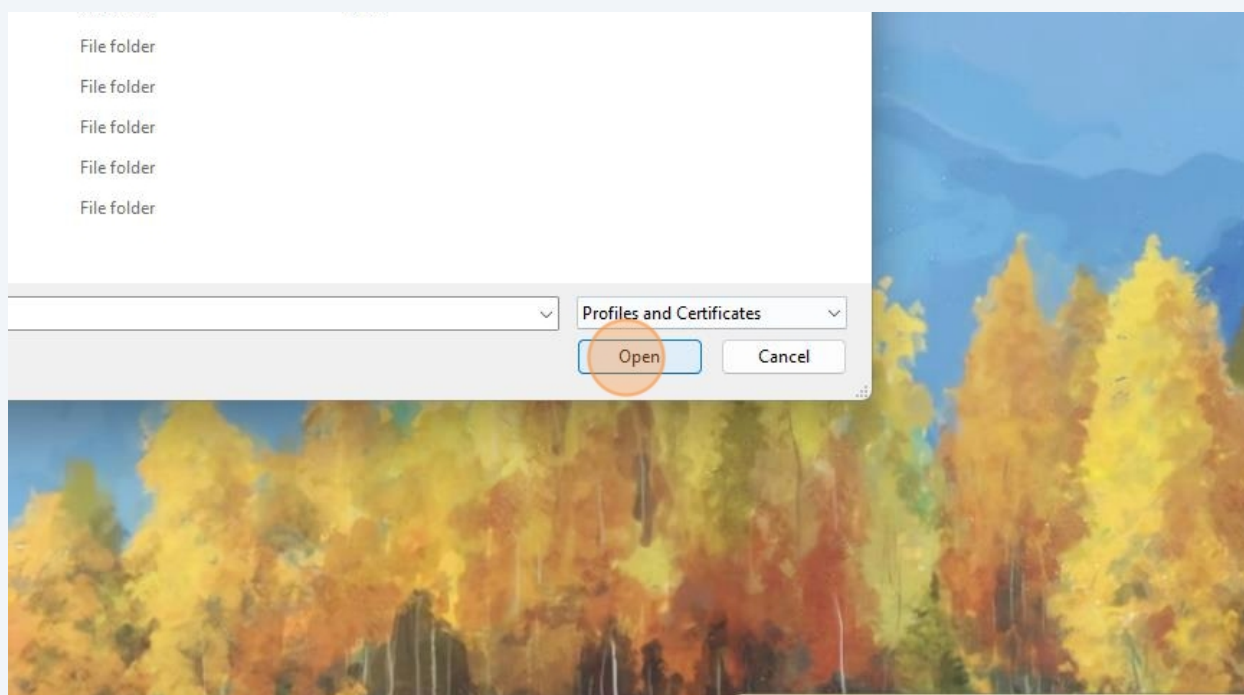

17 Click "browse"

18 then click on the VPN client profile you downloaded

19 Click "Open"

- 20 Click "add" and then the profile should be active and ready
